of cin 276	derive without 780
of notation 261	destructor 319
return 283	function 310, 390, 706
return by 148	function argument types 310
return, function 148	function, definition of 310
semantics 294	function, example of 646
value_comp() 485	function, implementation of 36
value_compare 485	function, operator :: and 312
value_type 443,480,552	function, pure 313
basic_string 583	output function 612
variable	return type of 424
constructor for global 252	vision 698
constructor for local 245	void 76
global 200, 228	expression, return of 148
temporary 244, 254	pointer to 100
variably-sized object 243	void*
Vec, range checking 53	assignment, difference from C 818
vector	specialization and 341
Fortran 668 arithmetic 65, 662	void*(),operator 616 volatile 808
bit 124	volatile 808
exponentiation 667	
mathematical functions 667	\mathbf{W}
operations 664, 667	• •
<pre><vector> 431</vector></pre>	waterfall model 697
Vector 435	wcerr 609
example 341, 780	<wchar.h> 432</wchar.h>
vector 52, 442, 469	wchar_t 72-73
< 457	wcin 614
= 447	wcout and 624
== 457	wclog 609
[] of 445	wcout 609
and array, valarray and 662	and wein 624
assign() 447	wfilebuf 649
constructor 447	wfstream 638
erase() from 452	while statement 136
input into 451	whitespace 614–615
insert() into 452	isspace() 114 wide
member type 442	character I/O 608
of bool 458	character classification 601
of vector 836	wide-character literal L' 73
vector of 836	widen() 645
vector <bool> 458</bool>	width() 629
bitset and 492	of input 616
Vehicle example 734	wifstream 638
vertical tab \v 830	wild pointer checking for 722
viewgraph engineering 704	Window example 398
virtual	
	wiostream 637
function 15 function, renaming 778	wiostream 637 wistream 614
